InstaBook Maker is the world's first patented technology that provides instant book on demand publishing. A fully and perfectly bound book can now be manufactured and in your hands within a matter of minutes.

InstaBook Corporation is situated in Gainesville, Florida.
US Patents 6012890 and 6213703.

For all enquiries in the UK, please use the contact page, we look forward to hearing from you.

InstaBook Maker (Produced by inventor Victor Celorio) is a fully functional book production system that is small enough to be installed virtually anywhere.

This unique method of manufacture not only provides an extremely cost effective way of producing and distributing books but also brings about the opportunity to print books tailored to suit the individual.

Out of print books are now available. Do you require 1 or 1000?

InstaBook Maker III

InstaBook Maker III is the most compact of the systems.

Approximate physical size of the systems vary due to a large flexibility.

The dimensions are from:
6' long X 3' high X 2.5' deep. (1830 X 915 X 765 mm deep.)

You may believe that such a system would be prohibitive in cost.

This is not the case, InstaBook is surprisingly good value for money.

There are many finance options available for the systems which can be tailored to suit individual needs as well as large contractual requirements.

Dependant upon your needs and purpose of the system, you may find that finance is not an issue, InstaBook requires very little output to initiate profit.

InstaBook Double Header

For large production requirements, the InstaBook Maker Double Header system allows you to manufacture 2 books at the same time. Your production doubles and your time is reduced by half. Up to 200 *Different* books per 8 hour shift is possible. (Industry standard 5% coverage)

Peace of mind is not an issue, all of the systems are covered with a one year parts and labour warranty along with a service contract.

For more detailed information, please feel free to contact us and we will be happy to assist in every way.

InstaBook. World's first true book on demand system.
